PROFILE

Dedicated Computer Science graduate from Loughborough University with hands-on experience spanning front-end development, UX/UI design, and agile collaboration. Driven by a passion for building accessible and responsive web applications. Seeking a graduate software or UI engineering role to contribute to impactful, user-centred digital solutions.

TECHNICAL SKILLS:

- **Frontend Development:** React.js, JavaScript, HTML, Vanilla CSS, BEM.
- **Backend & Databases:** Node.js, MongoDB, Python, PHP, Java, C++, C#, MySQL.
- **Cloud & Deployment:** Vercel, Railway, Cloudflare, Cloudinary, Cloudflare R2, GCP, Azure DevOps.
- **Design & UI:** Figma, Adobe Illustrator.
- **Tools & Environments:** Git, VS Code, SSH Remote Development, Agile Methodologies.

EMPLOYMENT & WORK EXPERIENCE

UX/UI Development Placement Student | Pinewood.AI | Aug 2024 to Sept 2025

- Worked within a User Experience team to design and maintain a global component library.
- Led the end-to-end design of a new 'Deal File' feature requested by several customers, ensuring high customer satisfaction and retention.
- Created wireframes and interactive prototypes using Figma.
- Organised and led feedback sessions with stakeholders, reducing iteration time and improving final design outcomes.
- Collaborated weekly with product owners and the UX lead to ensure alignment with business goals and design frameworks.
- Prioritised inclusive design by consistently considering a diverse range of user needs across global markets.

KEY PROJECTS

Social Fitness App (Progressive Web App) | Final Year Project

- Developed a full-stack Progressive Web App featuring gamification logic, real-time leaderboards, and social networking capabilities.
- Built the frontend architecture using React.js and managed complex state for seamless user interactions.
- Engineered the backend with Node.js and utilised MongoDB aggregation pipelines to process and display leaderboard data.
- Managed a comprehensive deployment pipeline using Vercel for the frontend, Railway for the backend, and Cloudflare for domain security.
- Integrated Cloudinary for image asset management and Cloudflare R2 specifically to handle LiveKit replays.

Online Portfolio Website | Personal Project

- Developed and deployed a responsive portfolio website to showcase technical projects and design work.
- Implemented responsive layouts and accessibility best practices using HTML, Vanilla CSS, BEM methodology, and JavaScript (React).

Client Website | Team Project Lead

- Led a 6-member team to design and develop a client-specified web application.
- Coordinated timelines, managed task ownership, and facilitated team communication to deliver the project on schedule with excellent client feedback.

EDUCATION

Computer Science BSc (Hons) | Loughborough University | Oct 2022 to June 2026

- **Dissertation:** Achieved 75.3% (First-Class).
- **Classification:** 1st (First) Class.
- **Key Modules:** Team Projects (85%), Introduction to Programming and Databases (79%), Software Engineering 2 (78%), Human-Computer Interaction (71%).
- **Focus Areas:** Software development methodologies (Agile, Waterfall), relational database design, and building scalable full-stack applications.

A-Levels | Shireland Collegiate Academy Sixth Form | Sept 2020 to June 2022

- Art (A*), Mathematics (A), Computer Science (B)

INTERESTS

- Continuous learning in cybersecurity, specifically threat modelling, the Cyber Kill Chain, and the NIST framework.
- Following football (Manchester United!).
- Refining web architecture and frontend logic through 'CSSBattle'.
- Reading science fiction novels (Favourite: *Project Hail Mary* by Andy Weir).
